REGISTERED VERSION LICENSE (For Registered Users)

One registered copy of File Merge Express may be dedicated to a single person who uses the software on one or more computers or workstations for which they are the sole, primary user.

A single user license may be used to process as many files on as many drives or network shares as you like. There is no restriction on the number of files that can be processed.

Licensing is not based on "concurrent" users. Licenses may not be "shared". A single user license registration may not be made available in any form to multiple users or workstations unless you have purchased a number of licenses that matches the number of users who will be using the program. If you make the registered version the software of File Merge Express available through a network and accessible by multiple users or workstations you are required to purchase licenses for the software covering the number of users on all workstations that will access the software

If File Merge Express is installed on a computer or workstation that has multiple user logons and if multiple users of that machine will access the program .exe you should purchase a number of licenses that matches the number of users.

The program is distributed and licensed in separate 32-bit and 64-bit versions. Use of the 32-bit version of the program on a 64-bit operating system is not supported. A single format license (32 vs 64-bit) cannot be automatically exchanged or swapped between forms. Combined '32 and 64-bit version' license(s) are also available for situations where a given user needs to run the program on separate 32- and 64-bit computers. Under no conditions can a combined '32 and 64-bit version' license be subdivided or 'shared' among multiple users.

Special pricing is available for multiple licenses. Please visit our website at <http://www.funduc.com> or see Purchase Information in the program F1 documentation for information about pricing and registration options.
